DETAILED ACTION

Allowable Subject Matter

Claims 1-3, 36-38, 71-73 and 106-209 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 36, 71 and 106 have been amended to include further details on how the files are analyzed (i.e. deriving the peak/mean) the scale factors are determined (using the peak/mean to create scale factors) and how the scale factors alter the files (i.e. adjusting the peaks/means in accordance w/ the measured values and the recording mediums max value). Prior to these amendments, the combination of Heyl in view of Best disclosed all limitations of the claims. However, neither Heyl nor Best gives precise details of how the actual measurements, scale factor derivations or scaling is performed. The claims now provide specific detail to the scaling which is neither taught nor made obvious by the prior art. Further, it would not have been obvious to modify Heyl or Best to arrive at these limitations without using the hindsight of Applicant's disclosure.

Regarding the 35 U.S.C. 101 rejections, Claims 1, 36, 71 and 106 now have a practical application claimed in the form of playing back an audio signal. The

specification also discusses this improved audio playback and thus the rejections under 101 have been removed.

.
Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
